

Activity 5 - Green Color Scale

1) Go outside and collect a variety of green leaves

- Check leaves on your tree. Are they all equally green? Is the green color similar on both sides of a leaf? What about other trees?
- To have a greater variety of green color, collect also leaves from bushes and herbs.

2) Create green color scale

- Put the leaves in a row, circle, or semicircle from the lightest to the darkest shade. How many shades have you discovered?

3) Share a photo of your scale at the [Discussion forum](#) during summer or autumn.
