Data Entry

GLOBE Data Entry consists of several options:

Live Data Entry - These pages are for entering environmental data - collected at defined sites, according to protocol, and using approved instrumentation - for entry into the official GLOBE science database.

Training Data Entry - These pages are for practicing data entry, either during workshops or when providing others a view of the data entry process. These data entry pages are based on the newer designed data entry pages. These data are not intended for entry into the official GLOBE science database.

Email Data Entry - Data can also be entered via email.

Data Entry Mobile App - The app allows users to enter data directly from an iOS or Android device for any GLOBE protocol.
